Sample rubric for lab 1

Criteria	Excellent (4 pts)	Good (3 pts)	Satisfactory (2 pts)	Needs Improvement (0-1 pts)
Tool Installation & Execution	All required tools (pip, jetson-stats, memory profiler, Jupyter Lab) are installed and executed correctly without errors. The resource monitor is running as instructed.	Most tools are installed and executed correctly, but there were minor issues with one tool that were resolved.	Significant issues were encountered during installation, or one or more required tools were not installed/run.	Students were unable to install and run the required profiling tools.
Data Collection & Reporting	The device statistics table is filled with accurate data. The resource monitor report is submitted and correctly formatted.	The table is complete but contains a minor error. The resource monitor report is submitted.	The table is incomplete or contains multiple errors. The resource monitor report may be missing.	Data collection was not performed or submitted.
Analysis & GitHub Submission	Answers to questions in the Jupyter Notebook are thorough, demonstrate a clear understanding of the profiling data, and are submitted in a correctly named "Lab 1" branch.	Answers are correct but lack deep analysis. The submission is in the correct branch.	Answers are partially correct or incomplete. Branching may not be correct.	Answers are missing or incorrect, and the GitHub repository is not updated correctly.
